

Produktinformation

Safety Temperature Limiter STL50Ex (acc. to DIN EN 14597, SIL 2)

- Intrinsically safe input for use with temperature sensors in 0/20; 1/21; 2/22
- DIN EN14597 Safety Temperature Limiter
Operating modes STB, STW, ASTB (double fault)
- DIN EN 61508 certified, SIL2
- DIN EN ISO 13849 certified, PL d
- 1 Relay for safety-relevant temperature limit, forcibly guided
- 1 Relay for pre-alarm
- Analogue output 0/4... 20mA; 0/2... 10 VDC
- Memory function for error message
- Operator lock (password protection)
- Contact input for external reset
- 24V DC signal for external alarm message

Characteristics

The STL50Ex safety temperature limiter is used where ever thermal processes must be monitored and the system must be transferred into a safe operational state in case of fault. If the permissible temperature limit value is reached, or if a fault occurs within the permissible temperature range on the monitoring equipment (sensor open, sensor short-circuit, failure of a component part in the device, fault in the software, failure or inadmissible value of the supply voltage etc.), the STL50Ex switches off without delay. The alarm contact is activated, the LED ALARM on the front panel and the back-lighting of the display light up, and the error cause is indicated as plain text on the display. In addition, there is a 24 V DC signal present on the terminals 16-17 for an external alarm signal. Alternatively, the device can be reset using an external contact. In addition, the STL50Ex optionally has an configurable analog output with up or downscaling function, as well as a pre-contact.

Description

Configuration

The device is configured via front side buttons in connection with the graphic display.

Operating modes

The device can be used as:

STB → Maximum- or minimum-monitoring with hold. Reset possible after omission of the fault with the external or internal button.

ASTB → as before, but monitoring the exhaust gas temperature

STW → Maximum- or minimum-monitoring without hold.

Automatic reset after leaving the dangerous range.

Switching hysteresis always acts in the direction of safe range.

The last fault is stored as plain text and can be called up in the working level and deleted.

Temperature sensor

When using the device according to DIN EN14597, temperature sensors which are approved according to DIN EN14597 must be used!

Technical data

Power supply

Supply voltage	: 230 V AC $\pm 10\%$; 115 V AC $\pm 10\%$ 24 V DC $\pm 15\%$
Power consumption	: < 4 VA
Conformity	: CE

Ambient conditions

Operating temperature	: -10...+55 °C
Storage temperature	: -30...+60 °C
Relative humidity	: < 95 %
Condensation	: not permitted, operation only in vibration less ambient
DIN EN 14597	: Modes STB, STW, ASTB
DIN EN 61508	: SIL2
DIN EN ISO 13849	: PL d, Cat. 2
EN IEC 60079	: II (1) G [Ex ia] IIC/IIB III (1) D [Ex ia Da] IIIC

Input

Pt100	: -100.0...+600.0 °C, 3-wire, 3-wire, max. line resistance 4 Ω each line, sensor current < 1 mA (non self heating)
-------	--

Thermocouple

Type J	: Fe-CuNi -100.0...+800.0 °C
Type K	: NiCr-Ni -150...+1200 °C
Type N	: NiCrSi-NiSi -150...+1200 °C
Type S	: Pt10Rh-Pt 0...1600 °C cold junction compensation integrated

Accuracy	: < 0.5 %, ± 2 Digit
Temperature coefficient	: 0.01 %/K
Display	: graphic LCD-display 28 x 64 Pixel, with white LCD-backlight

Output

Relay	: SPDT < 250 V AC < 200 VA < 2 A $\cos \Phi \geq 0.7$ < 250 VDC < 80 W < 2 A, internal fused 2 A (slow-blow)
Pre-alarm relays	: SPDT < 250 V AC < 500 VA < 2 A ohmic load; < 30 VDC < 60 W < 2 A,

Produktinformation

Analogue output	: 0/4 ... 20mA burden $\leq 500\Omega$; 0/2...10V burden $> 500\Omega$, galvanically isolated Output automatically changing (burdendependent)
Accuracy (analogue output)	: 0,04 %; TK: 0,01% /K
Case	: Polyamide (PA) 6.6 , UL94V-0, TS35 acc. to DIN EN 60715
Weight	: approx. 450 g
Connection	: screw terminals 0.14..2.5 mm ² (AWG 26 .. 14)
Protection class	: IP20, DIN EN 60529, BGV A3

Accessories

Temperature sensor

- When using STL50Ex as safety limiter -or guard- according to EN14597, safety temperature sensors acc. to 14597 have to be used: See our products TR296/293, TC296/293
- Temperature sensor for SIL applications: Temperature sensors without transducers are passive elements and not SIL-classified.

All sensors of our portfolio can be used. PFD characteristics for resistance elements or thermocouples are to be found in the standard tables. Alternatively manufacturer declarations of evaluation electronics and sensors to the SIL level can be created on request.

Ordering code

STL50Ex - 1. - 2. - 3. - 4.

1.	Device type/input		
	1	Pt100, 3-wire	-100.0..+600.0 °C
	5	Thermocouple	
		J (Fe-CuNi)	-100.0..+800.0 °C
		K (NiCr-Ni)	-150..+1200 °C
		N (NiCrSi-NiSi)	-150..+1200 °C
		S (Pt10Rh-Pt)	0..1600 °C
2.	Output		
	1R	1 alarm output relay	
	2RAO	2 relay outputs + analog output	
3.	Supply voltage		
	0	230 V AC, ± 10 % 50-60 Hz	
	1	115 V AC, ± 10 % 50-60 Hz	
	5	24 V DC, ± 15 %	
4.	Options		
	00	without option
